

Corporate_Social_Responsibility_Analysis

1. Project Overview and Objective :

This project involves cleaning, transforming, and analysing raw data using **Excel** and creating an interactive **Power BI dashboard** to derive meaningful business insights.

The main objective is to demonstrate data pre-processing techniques using Excel and an interactive Power BI dashboard visualization to make informed decisions.

2. Data Sources :

- **Source Description and Timeline:** Indian Data portal / **and** 2014-2015.
Link::https://indiadataportal.com/p/corporate-social-responsibility-csr/r/mca-csr_projects_aggregated-dt-yr-iuo
 - **Domain:** Social Welfare/Socio Economic.
-

3. Problem Statement :

- To analyse Consolidated view of CSR Projects across different regions and sectors in India segmented annually.
 - To analyse the patterns and trends followed to aggregated expenditure
 - To evaluate the performance and their total project funds and their geographic identifiers such as a state, district, and potential integration.
 - To understand their trends and patterns of this data it will help to gain insights into the allocation and their actual spending.
-

4. Attribute (Column /Features) Details:

Attribute Name	Data-type	Description
ID	Integer	Unique identifier for each record
Year	Integer	Date with Year
State Name	String	Name of the State
State Code	Integer	Code number of the state
District Name	String	Name of the District
District code	Integer	Code number of the district
Development sector	String	Name of the sector

Project outlay amount in lakhs	Currency	Projected amount for project
Amount spend in lakhs	Currency	Project spending amount
Remaining amount in lakhs	Currency	Balance amount
Utilization status	String	Amount status

5. Tools & Technologies

- **Excel:** Data cleaning, transformation, and Pivot Tables.
 - **Power BI:** Data modelling, DAX calculations, visualization, and interactive dashboard creation.
-

6. Data Pre-Processing (Excel / Power Query)

Tasks Performed:

- **Data Cleaning & Transformation:** Removed duplicates, handled missing values, standardized formats, and created calculated fields.
 - **Filtering & Sorting:** Organized data to focus on relevant records.
 - **Pivot Tables:** Generated Pivot Tables for data summarisation and initial insights.
-

7. Analysis and Visualization (Power BI)

Dashboard Features:

- Multiple Visualizations based on problem statements: Bar charts, line charts, pie charts, cards, and tables to communicate insights. (List Out)
 - Make your Report interactive Layout using Drill-down, Filters and slicers
 - Bookmarks, Clear Titles for each visuals & Labels is must.
 - Create a consolidated Report /Dashboard.
-

8. Insights & Conclusions

Key Findings and insights:

- CSR expenditure has shown variation across years, indicating changing investment priorities.
- The Education and Healthcare sectors received the highest share of CSR funding.

- Certain sectors consistently attracted more funds, while others remained underfunded.

1. Descriptive Analysis -

- Total CSR expenditure was distributed across multiple social sectors.
- Education, Healthcare, and Rural Development received the majority of funding.
- CSR spending differed significantly between companies and years.

2. Diagnostic Analysis -

- Companies prioritized sectors that create greater social impact and align with their CSR objectives.
- Government initiatives and societal needs influenced funding allocation.
- Sector-specific requirements led to differences in expenditure patterns.

3. Predictive Analysis -

- CSR spending is expected to continue growing in high-priority sectors such as Education and Healthcare.
- Companies may increase investments in sustainability and environmental projects.
- Underfunded sectors may receive more attention in future years to balance social impact

4. Prescriptive Analysis -

- Allocate funds more evenly across sectors requiring greater support.
 - Regularly monitor CSR performance to improve fund utilization.
 - Use data-driven decision-making to identify high-impact projects.

10. Conclusions

The analysis shows that CSR investments are primarily concentrated in the Education and Healthcare sectors, reflecting their importance in social development. By leveraging data-driven insights and optimizing fund allocation, organizations can maximize the impact of their CSR initiatives and contribute more effectively to sustainable community development.

The integration of Excel and Power BI proved effective for end-to-end data analysis, from raw data to visual reporting.
